AI engineer building production LLM systems, including voice agents, retrieval pipelines, and multi-agent tooling, with React, TypeScript, and FastAPI.

// EVIDENCE

- Built and deployed a production AI voice receptionist (FastAPI, Twilio, OpenAI Realtime, Qdrant, Redis, PostgreSQL, Docker) that answers real client calls, retrieves business knowledge with RAG, and books appointments.
- Designed AgentOps, a local-first multi-agent platform on LangGraph and Ollama, with no cloud API dependency.
- Package local models as Ollama Modelfiles with JSONL training datasets, producing task-specific agent behavior for local-first tooling.
