ALEXANDER SANTIAGO

FULL-STACK TRACK

Paterson, NJ · as42519256@gmail.com · (973) 653-0992 · github.com/as4584 · linkedin.com/in/alexander-santiago-26a170292

Full-stack developer shipping production web and mobile systems for real clients, across React, React Native, and FastAPI.

// EVIDENCE

- Built BakeryPOS, a point-of-sale and inventory system (.NET 8, WPF, SQLite, C#) from the client's own data, with ongoing support keeping it in daily production use at a retail bakery. The client owns the system outright, saving an estimated $590 to $830 a year in subscription POS fees.
- Built Resqlo, an inventory and sales platform (React Native, FastAPI, PostgreSQL) with barcode scanning, Stripe payments, and 1,043 backend tests at 95.8% coverage.
- Designed and deployed a company website (Next.js, React, TypeScript) on Vercel with a git-push deployment workflow and ongoing content updates.
- Operate the production stack end to end: Docker deployments, Caddy reverse proxy, HTTPS routing, health checks, and GitHub Actions CI, with gated deployments and smoke tests keeping client services online through every release.

// CORE SKILLS FOR THIS TRACK

C# · .NET · React · TypeScript · React Native · Next.js · FastAPI · PostgreSQL · Docker · CI/CD

// EDUCATION

- Passaic County Community College: AS Computer Science, in progress, expected Fall 2027
- New Jersey Institute of Technology: attended 2023 to 2025
