# ALEXANDER SANTIAGO

IT SYSTEMS TRACK

Paterson, NJ · as42519256@gmail.com · (973) 653-0992 · github.com/as4584 · linkedin.com/in/alexander-santiago-26a170292

IT support and operations: Linux servers, Docker deployments, networking, and workstation builds, run hands-on every day.

## // EVIDENCE

- Operate a production Linux and Docker server with a Caddy reverse proxy: deployments, HTTPS routing, health checks, updates, and incident response for hosted client applications, with gated deployments and smoke tests keeping client services online through every release.
- Configure and troubleshoot LAN, wireless, VPN, tunneling, and network segmentation on self-managed TP-Link equipment.
- Build, upgrade, and repair PC workstations, including a Ryzen 7 9800X3D desktop build and an ASUS ROG Strix laptop, both in daily use; install operating systems, drivers, and peripherals.
- Set up user accounts, roles, and access for hosted platforms, including a Supabase-backed application with authentication.

## // CORE SKILLS FOR THIS TRACK

Linux · Docker · Caddy · LAN / Wireless · VPN & Tunneling · PC Hardware

## // EDUCATION

- Passaic County Community College: AS Computer Science, in progress, expected Fall 2027
- New Jersey Institute of Technology: attended 2023 to 2025
